Section 4: FIRST AID MEASURES

<p>Description of Necessary First Aid Measures:</p>	<p>In case of poisoning by any exposure route contact a doctor or Poisons Information Centre on 131 126. Have the product label or SDS with you when calling or going for treatment.</p> <p>Ingestion: If swallowed, seek medical advice immediately and show the container or label. Do NOT induce vomiting.</p> <p>Eye contact: Rinse immediately with plenty of water, also under the eyelids, for at least 15 minutes. Remove contact lenses. Immediate medical attention is required.</p> <p>Skin contact: Take off all contaminated clothing immediately. Wash off immediately with plenty of water. If skin irritation persists, call a physician. Wash contaminated clothing before re-use.</p> <p>Inhalation: Move the victim to fresh air. If breathing is irregular or stopped, administer artificial respiration. Keep patient warm and at rest. Call a doctor or Poisons Information Centre immediately.</p>
<p>Poisoning Symptoms:</p>	<p>Poisoning symptoms in laboratory animals were non-specific</p>
<p>Medical Advice:</p>	<p>Treat symptomatically.</p>

Section 5: FIRE FIGHTING MEASURES

<p>Suitable Extinguishing Media:</p>	<p><i>Extinguishing media - small fires</i> Use water spray, alcohol-resistant foam, dry chemical or carbon dioxide. <i>Extinguishing media - large fires</i> Alcohol-resistant foam or water spray.</p>
<p>Hazards from Combustion Products:</p>	<p>As the product contains combustible organic components, fire will produce dense black smoke containing hazardous products of combustion (see section 10). Exposure to decomposition products may be a hazard to health.</p>
<p>Special Protective Precautions and Equipment for Fire Fighters:</p>	<p>Wear full protective clothing and self-contained breathing apparatus. Do not allow run-off from fire fighting to enter drains or water courses. Cool closed containers exposed to fire with water spray.</p>

Section 6: ACCIDENTAL RELEASE MEASURES

<p>Emergency Procedures:</p>	<p>In case of spillage it is important to take all steps necessary to</p> <ul style="list-style-type: none"> • Avoid eye and skin contact • Avoid contamination of waterways
<p>Methods and Materials for Containment and Clean Up:</p>	<p>Procedure for spill</p> <ol style="list-style-type: none"> (1) Keep all bystanders away (2) Wear full length clothing and PVC gloves (3) Reposition any leaking containers so as to minimise further leakage

	<p>(4) Dam and absorb spill with an absorbent material (eg sand or soil)</p> <p>(5) Shovel the absorbed spill into drums</p> <p>(6) Disposal of the absorbed material will depend upon the extent of the spill</p> <ul style="list-style-type: none"> • For quantities up to 50 L of product bury in a secure landfill site • For quantities greater than 50 L seek advice from the manufacturer (use emergency contact number below) before attempting disposal. Contain in a secure location until disposal method is established <p>(7) Decontaminate spill area with detergent and water and rinse with the smallest volume of water practicable</p>

Section 7: HANDLING AND STORAGE

Precautions for Safe Handling:	<p>Will irritate the eyes. Avoid contact with eyes. When opening the container, preparing solution and using the prepared spray wear:</p> <ul style="list-style-type: none"> • elbow-length PVC gloves • face shield or goggles <p>When handling treated potatoes wear PVC gloves. Wash hands after use. After each day's use, wash gloves and face shield or goggles.</p>
Conditions for Safe Storage:	<p>Store in the closed, original container in a cool, well-ventilated area. DO NOT store for prolonged periods in direct sunlight.</p>

Section 8: EXPOSURE CONTROLS / PERSONAL PROTECTION

ALWAYS READ AND FOLLOW THE LABEL INSTRUCTIONS AND WARNINGS

	<i>Component</i>	<i>Exposure limit</i>	<i>Value type</i>
National Exposure Standards:	1,2-propanediol	10 mg/m ³ Particulates	8h TWA
		150 ppm Total (vapour & particulates)	
	formaldehyde	474 mg/m ³ 1 ppm 1.2 mg/m ³	8h TWA
		2 ppm 2.5 mg/m ³	15 min STEL
Syngenta Exposure Standards:	fludioxonil	10 mg/m ³	8h TWA
Biological Limit Values:	No biological limits allocated		
Engineering Controls:	<p>Containment and/or segregation is the most reliable technical protection measure if exposure cannot be eliminated. The extent of these protection measures depends on the actual risks in use.</p> <p>If airborne mists or vapours are generated, use local exhaust ventilation controls.</p> <p>Assess exposure and use any additional measures to keep airborne levels below any relevant exposure limit.</p> <p>Where necessary, seek additional occupational hygiene advice.</p>		
Personal Protective Equipment:	<p>The use of technical measures should always have priority over the use of personal protective equipment.</p> <p>When selecting personal protective equipment, seek appropriate professional advice.</p>		

Personal protective equipment should be certified to appropriate standards.

When opening the container, preparing solution and using the prepared spray wear wear:

- elbow-length PVC gloves
- face shield or goggles
