

# Hyödynnä kokemuksemme

**Arthur F1**

(LC9599)

**Uutuus**

- Härmänarka
- Satoisin tässä segmentissä
- Avoin generatiivinen kasvi, kukintoja itse harventava.
- Pienilehtinen
- Vahvat sivuversot
- Helppohoitoinen
- Hedelmien pituus 28 – 33 cm

Syngenta Seeds Vegetables has exercised reasonable care and skill in compiling this brochure. All resistances quoted refer only to races or pathotypes indicated at the varieties. Other pathogen races or pest biotypes capable of overcoming the resistance may exist or emerge. Syngenta Seeds Vegetables uses highly elaborate analytical methods to verify specific variety resistances. Specificity of pests or pathogens may vary over time and space and depends on environmental factors. In order to maximize the efficiency of a resistance it is highly recommended to mix different ways of control such as growing conditions, plant protection products and genetic resistance as part of an integrated crop management. All data in this brochure are intended for general guidance only and the user should apply it in accordance with his own knowledge and experience of local conditions. In case of doubt we recommend that a small scale trial production should be carried out to determine how local conditions may affect the variety. Syngenta Seeds cannot accept any liability in connection with this brochure.
