Alaska

Benefits

Producer/Grower

- High yielding, compact winter-hardy type
- Perfectly suited for the harvest period from October to March

Distributors/Consumers

- Compact habit
- Ideal for the pre-pack/over-wrap market

Siberia

Benefits

Producer/Grower

- A high yielding, frost hardy variety
- Excellent compact shape and in-built 'packability'
- Equally adapted for harvest in November through to late March/April from a successive planting programme
- Excellent standing ability in varying winter conditions
- Productive - even from later plantings

Canada

Benefits

Producer/Grower

- Good frost tolerance
- Exceptional standing for late harvest
- Ideally suited for planting dates up to 15 July
- Suitable for the late February to March harvest

Distributors/Consumers

- Blue-grey leaves surrounding a compact well protected head

Kamchatka

Benefits

Producer/Grower

- High yielding and frost-hardy variety
- Excellent compact shape and in-built 'packability'
- Perfectly suited for the harvest period from February to mid-March
- Very versatile - has demonstrated excellent standing ability in varying winter conditions

Distributors/Consumers

- Attractive dark green colour and a more Savoyed leaf than Siberia
- Good shelf-life
