

Cabbage

Cabbage

F1 hybrid

Early Dutch White

Junior

Benefits

Producer/Grower

- Early white cabbage with very good holding ability
- Suitable for harvest period September - October
- Versatile variety for early production by over-wintered glasshouse plants
- Very uniform and easy variety to harvest

Distributors/Consumers

- Compact, smooth, early white cabbage with very good holding ability
- Good for short term storage
- Retains its fresh market size and clean appearance over a long harvest window

Unifor

Benefits

Distributors/Consumers

- Uniform shape
- A compact round cabbage suitable for the perfect market-sized product
- Outstanding storage ability

Kilazol

Benefits

Producer/Grower

- Growing reliability due to its high Club Root resistance
- High yield - making it the perfect kilo-size cabbage

Distributors/Consumers

- Excellent uniformity
- Excellent internal structure which gives good storage ability

Cabbage

F1 hybrid

Processing cabbage

Large varieties for the processing industry, not suitable for high density fresh market production.

Kingston

Benefits

Producer/Grower

- High yielding variety
- The leaves strip down very easily following storage up to mid-March
- Excellent internal quality

Distributors/Consumers

- Good shape and larger frame
- Excellent white colour and clean texture for selling by head or for processing

Kilaton

Benefits

Producer/Grower

- Growing reliability due to its Club Root resistance
- Strong against internal black spot leading to storage reliability
- High yielding variety

Distributors/Consumers

- Long storage variety
- An attractive green external colour, even after long storage
- For fresh market or industry, depending on plant density (head weight of 2.5 – 4kg) and high uniformity (CMS)
