

# ADEPIDYN® technology – For control of leaf spot complex in soybeans

Outstanding control of leaf spot complex,  
Septoria, Cercospora and Corynespora.

ADEPIDYN® technology is especially effective against leaf spots in soybeans.

Used in soybeans, ADEPIDYN® technology brings a range of benefits including:

- ✔ **Safety:** ADEPIDYN® technology has been found to be safe on soybean whether used solo or in tank-mixes.
- ✔ **Best-in-class efficacy in all weather conditions,** making it one of the most effective disease control tools for soy growers.
- ✔ **Long duration effective control,** resulting in significant yield improvement.

ADEPIDYN® technology is designed to replace less effective compounds which have reduced effectiveness because of adaptation, or less sustainable compounds that are being removed from the market due to regulatory reasons.
